July Results

On July 14, The Views Golf Club hosted the Ricki Rarick Adult/Pro Junior Championships. Our own Rick Price and his grandson, Aayden Price, carded a 10 under par 62 to top the field of 39 teams 78. Looks like the future of golf in the Price family is secure.

“What do you say to someone who shot 17 strokes UNDER his age?”, asked Denny Garren. We all say CONGRATULATIONS, and you are our inspiration to WALT KNYCH. Walt shot a 1 under par 71. Great round Walt!

If you have witnessed a great round or golf shot that you feel warrants recognition, please let us know. We'd like to share it with everyone.

Pro Tip:

Visualization

Napoleon Hill, author of “Think and Grow Rich” said, “what the mind can conceive and believe it can achieve.” The next time you're on the range, practice visualizing your desired ball flight before you hit your shot. Actually, see it fly through the air and land at your target. See it in your mind's eye and commit to it, believe it! This will take practice but use positive self-talk and positive visualization as part of your pre-shot routine. On the putting green see the line and track of your putt and visualize the ball rolling on it and falling in the hole. Then put your best stroke on it. Don't beat yourself up over a missed shot. You will have plenty of opportunities to make up for bad shots. Try positive visualization and positive self-talk for your next practice session and then

take it out on the course! “Golf is a game that is meant to be fun!

Heat Exhaustion

With the triple digit temperatures, we have been experiencing, I want everyone to be aware of the signs of heat exhaustion: Nausea, heavy Sweating, muscle cramps, dizziness, confusion, clammy moist skin, pale or flushed complexion, fast and shallow breathing, extreme weakness or fatigue, slightly elevated body temperature. If you are experiencing any of these symptoms, please do not push it. Get out of the sun and in a shady area, drink water (not alcohol) and if possible, get a cool towel and put it on your head to get your body temperature back to normal.
